INTRODUCTION

Early Childhood Education and Care

AILIE CLEGHORN & LARRY PROCHNER

This thematic issue on early childhood education and care (ECEC) takes the reader from the lead article by Peter Moss to the United Kingdom, Italy, India, Bangladesh, and beyond, to explore a wide range of issues involved in the transition from pre-school settings as well as from the home to formal schooling. The reader will find in these articles that the notion of transition is expanded not only to include an important event in the life of a child, but also to be shown as a cognitive phenomenon and a social process. The collection of articles thus contains several foci: shifts in the culture and language from the home/pre-school setting to school; differences in pedagogical

Abstract

Purpose

The purpose of this study is to understand the association between health behaviours of diet, physical activity, smoking cigarettes, alcohol consumption, safe sex and sleep quality with demographic (e.g. age, gender) and psychological (i.e. stress, self-esteem and sense of coherence) factors in Indian residential college students.

Design/methodology/approach

Students studying for Bachelor of Technology at residential colleges in India were invited to complete an online questionnaire regarding their health behaviours, demographics and

This stage will:

- Explain the philosophy of research
- Provide an overview of methodology and methods
- Explain research traditions and different schools of thought

This section deals with the philosophy of research and research methodology. Methodology underpins all the work you do. These are important concepts which need to be understood, but they're one of the areas people find most challenging, so don't worry if they don't sink in right away. Read the section and see which concepts are familiar to you. Identify other things that are new to you—you can return to this section at any time throughout your project.

Which Stats Test

Knowing which statistical test to use to answer your question is tricky.
Use this simple tool to help narrow down the options!

Question 1 - What is the purpose of your analysis?

- To look for differences between sets of data
- To look for an association between variables
